## Video Streaming Platform

The ultimate professional solution for building video and audio streaming platforms with a membership system. Designed for entrepreneurs and developers looking to create their own on-demand content platform with full control over monetization, users, and visual experience.

## KEY FEATURES

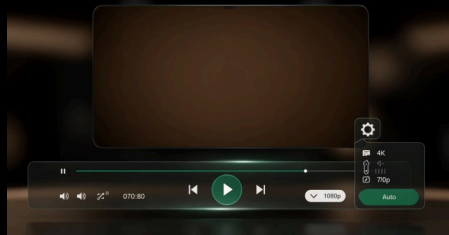

# A complete professional streaming platform

A powerful multimedia streaming platform comparable to professional on-demand entertainment services. Perfect for digital academies, training portals, exclusive content libraries, or any project requiring advanced video and audio management with subscription-based access control.

Combines cutting-edge streaming technology with a robust membership system, allowing you to monetize your content from day one with multiple business models.

# Advanced multimedia streaming system

## High-Quality Playback

Video and audio in high definition with professional controls and an optimized viewing experience

## Multiple Content Sources

Host files on your own server or integrate YouTube, Vimeo, and custom players via embed

## Extensive Catalogs

Optimized organization to manage thousands of content items without sacrificing performance

## OTT-Style Interface

Design focused on continuous consumption, similar to leading entertainment platforms

# Membership system and access control

The heart of your business model: a complete subscription management system that lets you control who sees what, when, and for how long.

## Unlimited Plans

Create as many membership tiers as you need with different benefits and pricing

## Tiered Access

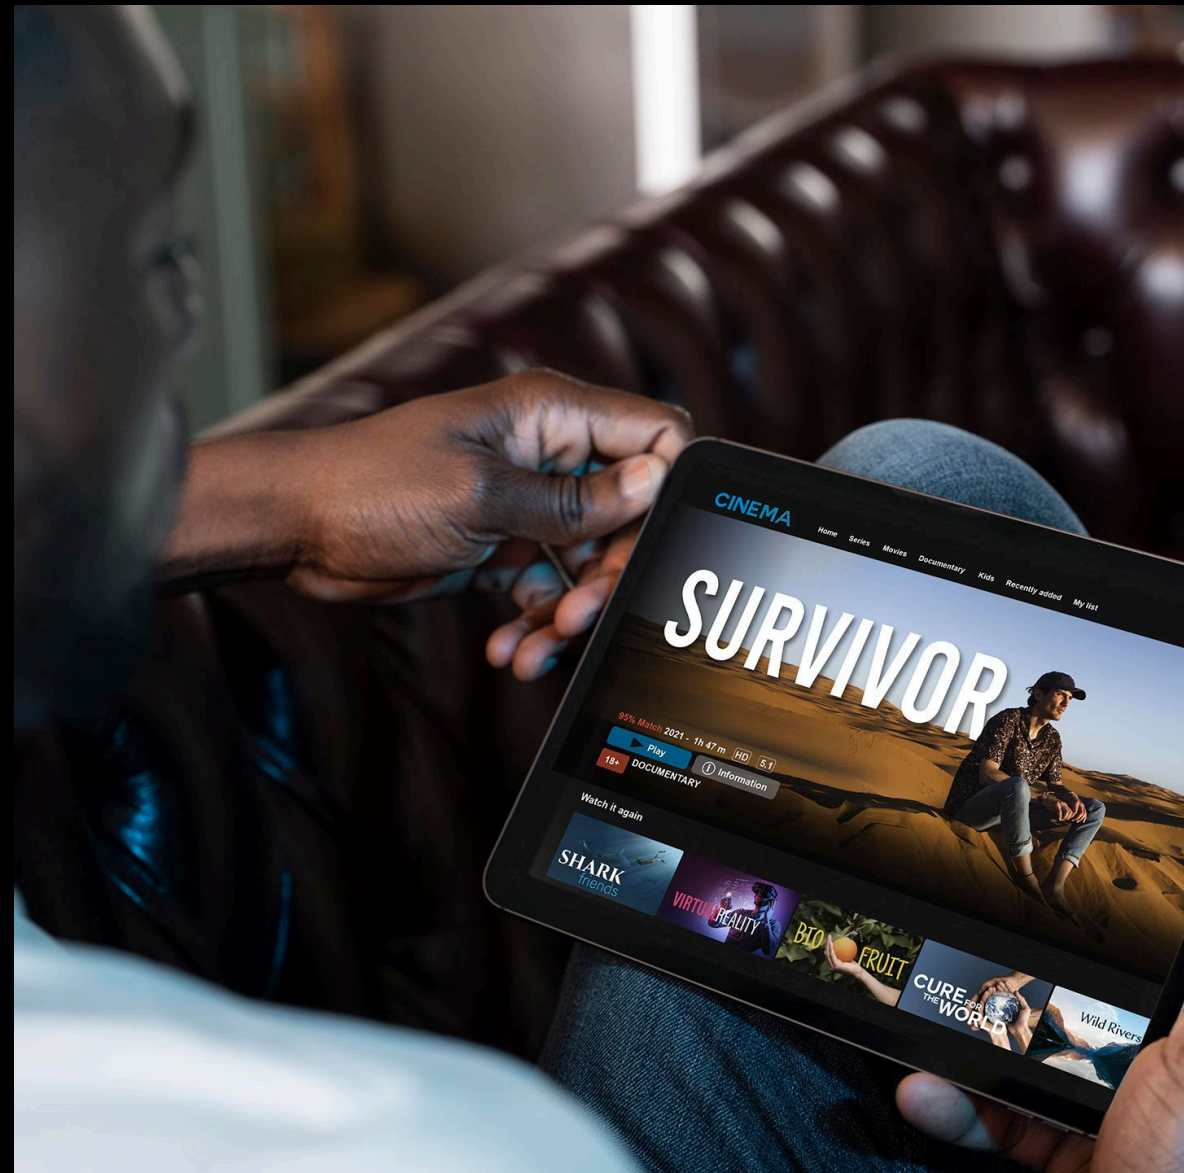

Restrict content based on user roles, creating exclusive experiences

## Drip Content

Release content progressively to maintain engagement and reduce cancellations

## Trial Periods

Offer temporary free access to convert visitors into paying subscribers

# Flexible payment and monetization options

Ready for commercial projects of any scale, with out-of-the-box integration for leading international payment gateways. Offers the flexibility to combine different monetization models to suit your business needs.

## Ideal Use Cases

- Premium subscription streaming
- Online courses with lifetime access
- Exclusive content for members
- Individual video libraries
- Freemium models with upgrades

### Recurring Payments

Monthly or annual subscriptions with automatic renewal

### Individual Sales

Monetize specific content without requiring a subscription

### Hybrid Models

Combine premium memberships with per-unit sales

# User experience designed for retention

Every feature is built to keep your users engaged, facilitate content discovery, and encourage continuous consumption. A modern experience that competes with the best platforms on the market.

## Customizable Profiles

Each user creates their own personalized space with individual preferences and settings

## Lists and Favorites

Smart watchlists to save content and resume viewing right where users left off

## Ratings and Reviews

A rating system that helps other users discover the best content

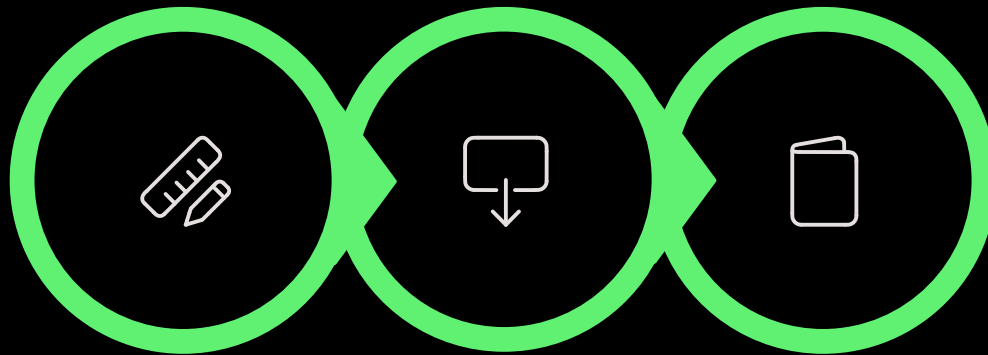

## Advanced Search

Find content quickly with smart filters by category, genre, or popularity

## Social Login

Simplified access via social networks to reduce friction during registration

# Fully customizable professional design

**Choose a  
Template**

**Drag and  
Drop**

**Publish Now**

## Unlimited Customization

- Intuitive drag-and-drop visual builder
- Pre-designed templates ready to use
- Full editing of headers and menus
- Mega menus for complex navigation
- Automatic responsive design across all devices
- Clean, modern, and professional look

No advanced technical knowledge required — create a platform with a unique visual identity that truly reflects your brand.

# Structured catalog management

Perfect for platforms with large volumes of content that require clear hierarchical organization, making both administration and user navigation effortless.

## Series and Seasons

Organize content into series with multiple seasons and numbered episodes

## Multiple Categories

Classify by genre, topic, difficulty level, or any custom taxonomy

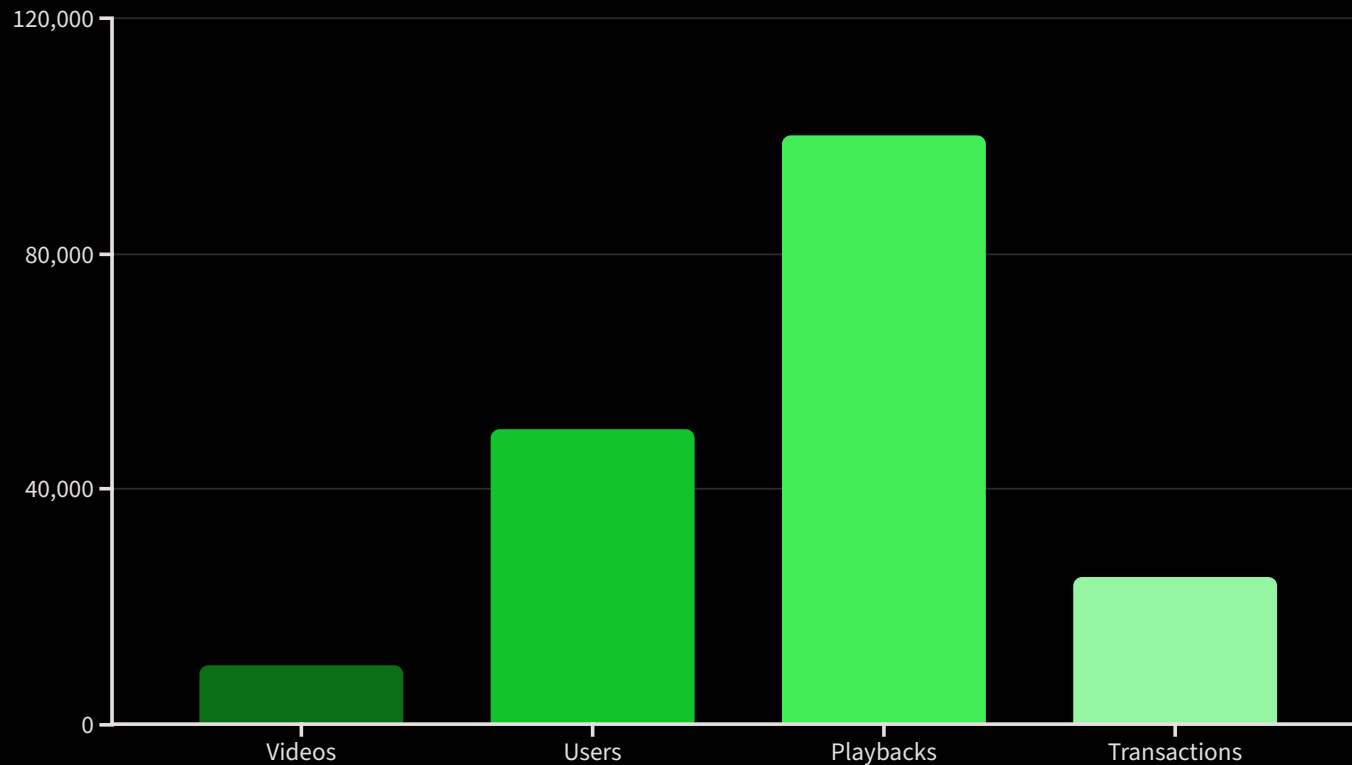

## Modular Courses

The perfect structure for academies with complete training programs

## Thematic Libraries

Group educational, audiovisual, or entertainment content into curated collections

# Performance and enterprise scalability

## Built to grow with you

An optimized architecture that maintains performance even with extensive media libraries and thousands of concurrent users. Compatible with digital stores and the sale of additional products.

Suitable for both early-stage projects and large-scale platforms with high traffic and resource demands.

# Launch your streaming platform today

## Video/Audio Streaming

On-demand entertainment platforms in the style of Netflix

## Online Academies

Premium course portals with monthly subscription

## Private Libraries

Exclusive content for closed communities

## Premium Communities

Membership-restricted access spaces

A complete and robust theme that combines advanced multimedia content management, full subscription-based access control, diverse monetization options, a modern and adaptive design, and a premium platform-level user experience. Everything you need to launch your professional streaming project.
